

Design Ideas and Planning Sheet

What are you going to cook?

How will your product be nutritious?

What food groups and vitamins is your product going to be made from?

Draw a design of your planned product here. Make sure you include labels for each part of your product.

How will you create your food product? Write down the equipment and steps you will use to create it.

After making your product, does your design work like you planned? Write down what works well and what you would change about your design next time.
